

Certificate of Analysis

10% MICRO CBD
Matrix: Derivative
Accession Number: 032221UD0010
Harvest/Lot ID: 10% MICRO CBD 091821
Seed to Sale: \*
Batch Date: 03/19/21
Batch #: 091821
Sample Size Received: 15 ml
Retail Product Size: 15 ml
Ordered: 03/19/21
Completed: 03/27/21
Sampling Method: SOP Client Method

CANNABINOID RESULTS

Table with 3 columns: Total THC (0.000%), Total CBD (10.898%), Total Cannabinoids (10.944%)

Table with 11 columns (CBC to THCV) and 3 rows (Conc. (wt%), Conc. (mg/g), LOQ)

Table with 4 columns: Analyzed by, Date (03/26/2021), Instrument used (Shimadzu HPLC w/ PDA), Analysis Method

Full spectrum cannabinoid analysis utilizing High Performance Liquid Chromatography with UV detection (HPLC-PDA). (Method: SOP.KY.02.005) sample prep and Shimadzu High Sensitivity Method SOP.KY.02.012 for analysis. LOQ for all cannabinoids is 1 mg/L. % = %w/w = Percent (Weight of Analyte/Weight Product) Total Cannabinoids result reflects the absolute sum of all cannabinoids detected. \*\*Total Potential THC/CBD is calculated using the following formulas to take into account the loss of a carboxyl group during decarboxylation Total THC = THC + (THCa\*0.877) Total CBD = CBD + (CBDa\*0.877)

Microbials PASSED

Table with 2 columns: Analyte (Aspergillus Flavus, Aspergillus Fumigatus, Aspergillus Niger, Aspergillus Terreus, E. Coli, Salmonella) and Result (not present in 1 gram)

This report shall not be reproduced, unless in its entirety, without written approval from Universal Diagnostics. This report is an Universal Diagnostics certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly waived otherwise. Void after 1 year from test end date. Cannabinoid content of batch material may vary depending on sampling error. IC=In-control QC parameter, NC=Non-controlled QC parameter, ND=Not Detected, NA=Not Analyzed, ppm=Parts Per Million, ppb=Parts Per Billion. Limit of Detection (LoD) and Limit Of Quantitation (LoQ) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. RPD=Reproducibility of two measurements. Action Levels are State determined thresholds for human safety for consumption and/or inhalation. The result >99% are variable based on uncertainty of measurement (UM) for the analyte. The UM error is available from the lab upon request. The "Decision Rule" for the pass/fail does not include the UM. The limits are based on F.S. Rule 64-4.310.

Microbiological testing for Fungal and Bacterial Identification via Polymerase Chain Reaction (PCR) method consisting of sample DNA amplified via tandem Polymerase Chain Reaction (PCR) as a crude lysate which avoids purification. (Method SOP.KY.02.018) If a pathogenic Escherichia Coli, Salmonella, Aspergillus fumigatus, Aspergillus flavus, Aspergillus niger, or Aspergillus terreus is detected in 1g of a sample, the sample fails the microbiological-impurity testing.
